Introducing...

Our Innovative Solution for SI Joint Pain

Now Offering: Minimally Invasive SIJ Fusion

Studies show that the SI Joint is the source of pain for roughly 15-30% of patients suffering with persistent low back pain. There's good news! We now offer Minimally Invasive SIJ Fusion, a revolutionary procedure that gets you back to life faster. This innovative approach minimizes discomfort and recovery time, helping you regain control of your pain and get back to the activities you love.

About the SI Joint

The SI joints support the spine and hips, absorbing movement impact. Positioned between the iliac bones and sacrum, they facilitate flexibility with ligament and muscle support. However, aging, arthritis, and injury can cause pain due to bone friction. This pain may stem from various sources such as accidents, pregnancy, or surgery. Recognizing SI joint pain is crucial, as it can mimic lower back or disc issues. Accurate diagnosis and treatment are essential for managing SI joint discomfort effectively.

Causes of SI Joint Pain

- Lower back pain
- Sciatic-like pain in buttocks or leg
- Hip/pelvis/groin pain
- Reduced range-of-motion
- Pain climbing stairs or running
- Pain lying on one side
- Leg numbness or weakness
- Disrupted sitting patterns
- Difficulty moving from sitting to standing
- Sleep disturbances due to pain

Symptoms of SI Joint Pain

- Lower back pain.
- Pelvic stiffness or burning.
- Pain when rising from sitting.
- Isolated pain in one SI joint.
- Groin discomfort.
- Buttock, hip, and pelvic pain.

Conventional treatments not working?

- Physical therapy
- Chiropractic care
- Medication
- Therapeutic injections
- Radio-frequency ablation (RFA)

The Solution

Safe Posterior Approach
A safer approach that avoids vital anatomy such as neural structures and muscles

Incision as small as a dime 2 cm

Low Complication Rates
Approach allows for patients to have less procedure soreness and a quicker recovery
