Introducing our innovative solution for SI Joint Pain

Now Offering: Minimally Invasive SIJ Fusion

Studies show the SI Joint is the source of pain for roughly 15-30% of patients with persistent low back pain. There's good news! We now offer Minimally Invasive SIJ Fusion, a procedure that gets you back to life faster. It minimizes discomfort and recovery time, helping you regain control of your pain and get back to the activities you love.

About the SI Joint

The SI joints absorb movement between the spine and hips. Aging, arthritis, injury, or pregnancy can leave the bones rubbing together — pain that often mimics a lower back or disc problem.

Conventional care not working?

- ✔ Physical therapy
- ✔ Chiropractic care
- ✔ Medication
- ✔ Therapeutic injections
- ✔ Radiofrequency ablation (RFA)

Common Signs of SI Joint Pain

- ✔ Lower back pain
- ✔ Isolated pain in one SI joint
- ✔ Sciatic-like pain in buttocks or leg
- ✔ Hip/pelvis/groin pain
- ✔ Reduced range of motion
- ✔ Pain climbing stairs or running
- ✔ Pain lying on one side
- ✔ Leg numbness or weakness
- ✔ Disrupted sitting patterns
- ✔ Difficulty moving from sitting to standing
- ✔ Sleep disturbances due to pain

The Solution

Safe Posterior Approach
A safer approach that avoids vital anatomy such as nerves and muscles

Incision as small as a dime **2 cm**

Low Complication Rates
Allows patients to have less procedure soreness and a quicker recovery
